My Portfolio

Sousnigdho Das

AI/ML and Blockchain Enthusiast | Python & Web Developer |
Aspiring Full-Stack Engineer | Developer & Manager - Vedonyx /
Udality

Pune, Maharashtra, India

About Me

I am a passionate Python developer and AI/ML & Blockchain learner,
My coding journey began in 8th grade currently studying at Sri
Chaitanya Junior College, Working with Vedonyx & Udality.

Beyond AI/ML & Blockchain, I am also exploring Web Development,
aiming to bridge the gap between intelligent systems and scalable
applications. I enjoy working on multi-stage projects that involve both
algorithmic problem-solving and practical API integration.

Areas of Interest:

- Artificial Intelligence & Machine Learning
- Computer Vision (OpenCV, TensorFlow)
- Web Development (Frontend + Backend)
- API Integration & System Design

Collaboration Goals:

I'm open to working with teams and individuals on end-to-end
Python projects — from research to deployment.

Experience

Vedonyx & Udality

Senior Software Developer & Manager

September 2025 - Present

Delhi, India

Experience Programs (2025)

AWS APAC Solutions Architecture (Forage)

- Built a simple, scalable hosting setup with Elastic Beanstalk to fix slow response times as usage grew.
- Explained the design in plain language, including how the costs work.

Electronic Arts Software Engineering (Forage)

- Proposed a new feature for EA Sports College Football and wrote a clear proposal for stakeholders.
- Drew a class diagram and made a C++ header with class definitions.
- Fixed a bug and sped up the codebase with a better data structure.
